Nordic Seafood...

Nordic Seafood was founded in 1988 in the Danish fishing port of Hirtshals. With sales companies both domestically and internationally, Nordic Seafood is one of Europe's leading distributors of seafood from the whole world.

Nordic Seafood is owned by Nippon Suisan Ltd. (NISSUI) Japan – one of the world's leaders in seafood (fishery, aquaculture, and processing).

As importer, packer, and distributor, Nordic Seafood creates seafood value for our customers by staying ahead in terms of quality, dependability, and competitiveness. Our premises in Hirtshals include 2,300 m² of production facilities and 6,000 m² of cold stores.

With our own sales companies and our business partners, we work closely with our customers as a flexible and development oriented partner.

We keep up-to-date with the latest trends and possible applications which benefits our customers and work to meet individually wishes.

CRAB (DENMARK)

Item no	Product	Glaze 0%	
6209105	Crab (European green crab), whole, raw, unsorted	5 kg	

inspiration

” The European green crab is the most common crab in Denmark. It is almost too small to eat the meat, but gives a fantastic flavor to a bisque.

SUSTAINABILITY

We actively support sustainability in the seafood industry and do not only see this it as a good investment but also our duty to secure the seafood resources of our planet for future generations.

Global Links

- NISSUI has established "Global Links" as one of the leading global supply chains in seafood (fisheries, aquacultures, and processors). Nordic Seafood is one of the leading companies in this network..
- Global Links is an expression of a wish to combine the wealth of the oceans with scientific development and human values in a responsible utilization of resources for the benefit of the people of the world and with respect for future generations.
- The thoughts behind Global Links are in harmony with Nordic Seafood's long-standing basic values: the distribution of top-quality products based on ethical principles. This requires sustainable and reliable cooperation with our customers.
-

MSC's vision is of the world's oceans teeming with life, and seafood supplies safeguarded for this and future generations. The mission is to use the ecolabel and fishery certification program to contribute to the health of the world's oceans by recognising and rewarding sustainable fishing practices, influencing the choices people make when buying seafood, and working with partners to transform the seafood market to a sustainable basis. MSC collaborate with fishers, retailers, processors, consumers and others to drive change. MSC never compromise on the environmental standards they set, nor on their independence. MSC continue to lead the world in wild capture fishery certification, with the most trusted, recognised and credible seafood ecolabel.

ASC is an abbreviation that stands for Aquaculture Stewardship Council. ASC is an independent, international non-profit organisation that has developed a certification programme for responsible aquaculture. By choosing ASC-certified fish, consumers can rest assured that they are buying responsibly farmed fish, crustaceans and shellfish. ASC works with international producers, companies in the fish chain and supermarkets to meet the growing consumer demand for responsible fish. The ASC quality mark makes it easy for anyone to make a conscious and responsible choice.

Seafood Experts

If you would like to know more about what we can offer you.
Please feel free to contact our head office or one of our offices.
